DISCLAIMER

Certain statements contained in this presentation (the “Presentation”) relating to Givex Information Technology Group Limited, including its subsidiaries, (collectively, “Givex”, or the “Company”) constitute “forward-looking statements”, within the meaning of applicable securities laws, including without limitation, statements regarding future estimates, business plans and/or objectives, sales programs, forecasts and projections, assumptions, expectations, and/or beliefs of future performance. Such “forward-looking statements” involve known and unknown risks and uncertainties that could cause actual and future events to differ materially from those anticipated in such statements. Forward looking statements include, but are not limited to, statements with respect to commercial operations, future growth, the overall projected size of the market and other information that is based on forecasts of future results and other key management assumptions. The Company assumes no responsibility to update or revise forward-looking information to reflect new events or circumstances unless required by law.

Future Oriented Financial Information: To the extent any forward-looking information in this Presentation constitutes “future-oriented financial information” or “financial outlooks” within the meaning of applicable Canadian securities laws, such information is being provided to demonstrate anticipated results and the reader is cautioned that this information may not be appropriate for any other purpose and the reader should not

place undue reliance on such future-oriented financial information and financial outlooks. Future-oriented financial information and financial outlooks, as with forward-looking information generally, are, without limitation, based on the assumptions and subject to the risks set out above. The company’s actual financial position and results of operations may differ materially from management’s current expectations and, as a result, Givex’s revenue and profitability may differ materially from the revenue and profitability profiles provided in this Presentation. Such information is presented for illustrative purposes only and may not be an indication of our actual financial position or results of operations.

This Presentation includes market and industry data obtained from various publicly available sources and other sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third party sources referred to in this presentation or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company does not make any representation as to the accuracy of such information.

This Presentation does not constitute an offer to sell or a solicitation of an offer to buy any securities of the Company.

The securities of the Company have not been, and will not be, registered under the United States Securities Act of 1933, as amended, or any state securities laws, and such securities may not be offered or sold in the United States or to U.S. persons unless registered or exempt therefrom.

This presentation uses certain non-IFRS measures to evaluate the performance of the Company. Adjusted EBITDA defined as net profit (loss) excluding interest, taxes, depreciation and amortization (EBITDA) as adjusted for share-based compensation and related expenses, foreign exchange gains and losses and transaction-related expenses including those related to going public. The term “Adjusted EBITDA” does not have any standardized meaning prescribed within International Financial Reporting Standards (“IFRS”) and therefore may not be comparable to similar measures presented by other companies. Such measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Management believes that these non-IFRS financial measures provide useful information to readers as a supplement to reported IFRS financial information.

Management reviews these non-IFRS financial measures on a regular basis and uses them to evaluate and manage the performance of the Company’s operations. These measures should be evaluated only in conjunction with the Company’s comparable IFRS financial measures.
