Connecting Powerful Transactions

GIVEXGO

MANAGE YOUR BUSINESS FROM ANYWHERE WITH GIVEXGO

The restaurant industry often operates around the clock, requiring managers be constantly prepared and available, even off-site. Take on unique challenges that require immediate attention from anywhere, with the GivexGo app. GivexGo delivers real-time management functionality that updates every three minutes, so you can focus more on engaging your customers and creating genuine connections with team members. Whether you have one or hundreds of locations, you will always have access to clean and consistent information that you can trust from wherever you are. An extension of the Givex portal, GivexGo, is the only management app that ties into the Givex POS system and offers Key Performance Indicators (KPIs). Available on both iOS and Android, download today to minimize problem-solving time and maximize powerful transactions.

ACCESS

Who you are defines what you see. If you're an enterprise user, you will see the same set of stores you see on the Givex Portal. Regional managers or franchisees monitor and manage their stores only. Keep an eye on things while you're off-site, no matter how many locations you are responsible for.

MERCHANT SALES OVERVIEW

Secure, permission-based access to custom reports enables you to slice and dice today's information to better analyze how things are going and make business-critical decisions. Drill down to a specific store and view metrics or look at sales, transactions processed and labor percentage.

DAILY SALES AVERAGES

Sales figures can vary on a daily, weekly, and monthly basis. GivexGo maintains an accurate account of gross sales; net sales adjusted sales and labor costs. Amounts and percentages bring clarity to the number of discounts, voids, and returns performed.

LABOR CONTROL

Slow day at the Restaurant? The GivexGo app gives you a clear picture of your labor cost as a percent of your hourly sales so you know when you should send a few team members home early for the day. Manage this and more from anywhere.

ALERTS

Pre-set the notifications you want to receive. Never miss an update, a missed shift or run out of stock ever again. The app can also remind you to push out promotions and lets you turn discounts on and off in real time.

CUSTOM REPORTS

When it comes to data less is better. GivexGo summarizes the key metrics you need at a high level and gives you the ability to drill down further which allows you to stay on top of your game.

GRAPHS

Leverage the business information that directly impacts your sales, labor costs and inventory, with quick and responsive analytical graphs. Receive useful statistics at a glance and generate value from data that contributes to critical business decisions.
